

0 Garrett Road

- Water is not immediately available here via Garrett road. The closest water main for a developer to build to is in front of Vance County High School. The line is about 200 feet from the most south west corner of the property. This will have to be constructed by the developer in order to connect to our system
- Sewer is not immediately available, a new sewer line will have to be constructed by the developer in order to connect to our system.
- This property would be a potential city water and sewer customer
- The City does not currently extend utilities, so this will be a cost to the developer.
