The piece of property on the NE quadrant is full controlled access on both the I-85 off ramp and US 15. The Department purchased access rights when I-85 was built and would have compensated the property owner accordingly. To continue to protect the safety and mobility of the interchange we recently informed the current owner that we do not support any changes to the controlled access limits. Access to the pump station is for the utility provider only and the driveway pipe at the woods line is for our maintenance activities only.
