	Found condenser fan motor and blade bad on previous visit. Original visit was on 7/15 - once parts house opened on Monday we were able to locate a fan motor. The blade is obsolete. We replaced the motor hoping the blade was ok - unfortunately, the blade needed replaced as well. A different parts house found one blade at an out of town branch and had it transferred. Returned on 7/19 and replaced motor and blade. Cycled system. System is operating properly at this time.			
	Thank you.
