Re: Structural Inspection
151 Southerland Mill Rd
Henderson, NC 27537

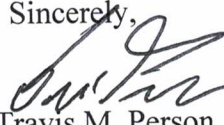

Dear Sirs:

An inspection has been performed on the foundation of the manufactured home described above. The foundation is structurally sound and the home is properly installed on a crawlspace foundation in accordance to FHA requirements for a permanent foundation as specified by HUD-7584, Permanent Foundations Guide for Manufactured Housing, dated September 1996.

The additions to subject home are structurally sound and are constructed in accordance to HUD's construction and safety standards. The additions do not adversely affect the structural integrity of the home or its foundation.

The unit appears to be located at its original installation location.

Sincerely,

Travis M. Person, PE
