

J-5890: Dabney Drive Upgrade - Henderson

Vicinity Map:

- Option 1 proposes a traditional intersection, similar to the existing intersection
- Option 2 proposes a roundabout

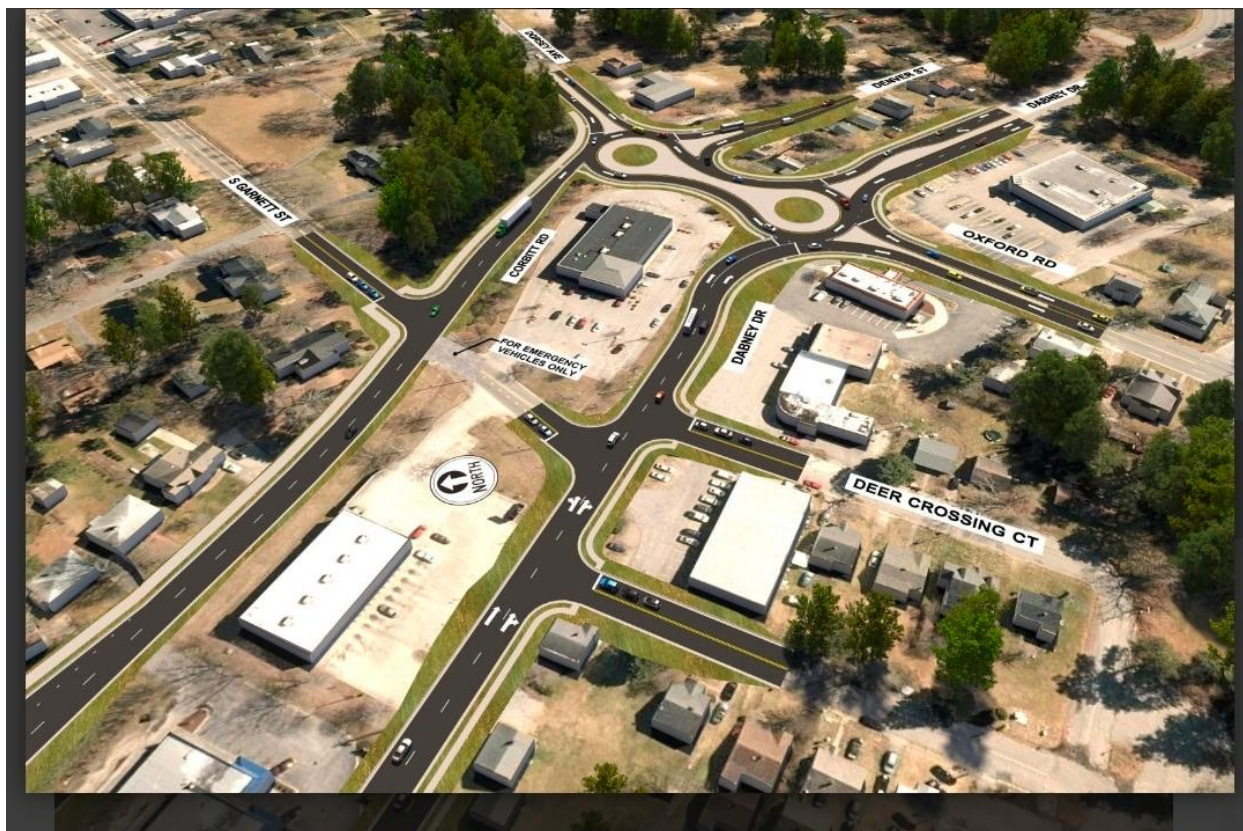

Concept 2: Upgrade Dabney Drive to a four-lane divided roadway with a raised median and curb and gutter.

Preferred Alternative

Based on comments received following the public meeting and stakeholder meetings, design revisions to Concept 1 Option 2 were studied.

Concept 1 Option 2A includes a shift of the roundabout at Dabney Drive and S. Garnett Street (U.S. 158) to Dabney Drive and Dorsey Avenue/Oxford Road.

A potential roundabout at Dabney Drive and S Beckford Drive/Graham Avenue was considered but is not being carried further based upon additional analyses.

U-5890: Dabney Drive Upgrade - Henderson

Translate

Proposal to upgrade Dabney Drive from Coble
Boulevard to U.S. 158 Business in Vance County.

Project Timeline

Milestone	Date*
Public Meeting 1	June 27, 2019
Public Meeting 2	February 13, 2024
Environmental Document	Fall 2025
Right-of-Way Acquisition	Summer 2026
Construction Begins	Summer 2029

** Future dates are preliminary and subject to change*

Purpose and Need

The purpose of this project is to improve mobility along Dabney Drive, an important east-west route in Henderson. The Dabney Drive corridor is anticipated to experience increased delays by 2040, with moderate wait times at several intersections along the corridor. Another benefit of the proposed project is enhanced pedestrian and bicycle accommodation along Dabney Drive.

Project Design Concepts

Two concepts were initially studied for this project:

Concept 1:

- Upgrade Dabney Drive for eastbound traffic
- Use existing Corbitt Road and the former railroad corridor for westbound traffic. This is also referred to as a one-way pair roadway.

The current designs for Concept 1 propose two intersection options at Dabney Drive and S. Garnett Street ([U.S. 158](#))
