Good Afternoon Natalie!

I spoke with you a few minutes ago regarding the property at 137 Vaiden Rd. This property appears to have been established in 1979. Well permits were not required in Franklin County until 2008. A well permit is not going to be available. It does appear that a well repair was done on 04/05/2012 but there is not going to be a permit associated with that. As far as the septic goes, I am not locating any names from the current tax records where any repairs or existing system permits have been applied for since its initial installation. I am sorry that I could not be of more assistance than this, but it is just too far back. Thank you!
