Pussywillow
SW7643

Optional Screen Trim & Screen Door:

White

Brick Veneer General Shale*:

Cortez

Stone Veneer*:

Buff Limestone

Brick Mortar:

Gray

*The colors shown will only approximate the dry paint color. Masonry images are provided by the manufacturer and may not reflect actual mortar color selected for package. Please check color schedule for actual mortar color. Pricing of painted brick can vary depending on elevation. Painted brick only applies to brick veneers, not brick only foundation elevations. The Drystack profile is laid in the same manner as the Ledge, Chisel Cut and Terra Cut profiles. The stones in all four of these profiles do often touch one another; but mortar will be visible between the stones. The Limestone profile has grout seams that are much wider than what is shown in the Limestone pictures from the manufacturer. Please visit other Ashton Woods homes in the area to see local installation methods of the stone veneer profiles.
