COLLECTED BY Valerie Stull DATE 8/18/25 TIME 10:50 ^{am} pm

<u>Contaminant</u>	<u>Present</u>	<u>Absent</u>
TOTAL COLIFORM	_____	☒
FECAL/E. COLI	_____	☒
RESULTS REPORTED BY <u>[Signature]</u>		DATE <u>8.20.25</u>

NOTE

Water samples should not be taken from an open well or unprotected spring or from any supply where there is any visible evidence of possible contamination. Water from such sources is unsafe, regardless of laboratory findings. If coliform bacteria are present the water is considered unsafe for drinking purposes. If coliform bacteria are absent, the water is considered safe for drinking purposes. It must be remembered, however, that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply. Also, if coliform bacteria are absent there is no guarantee that this water supply will remain potable.

**Samples due Monday - Thursday
8-3pm**
