LETTER OF APPROVAL

Robmir Inc
100 S Smithfield Road
Knightdale, North Carolina 27545

RE: Project Name: E. Jewett Avenue Subdivision
Acres Approved: 1.91
Application ID: PA-001895
Permit Number: FRANK-2024-0102
Address: E. Jewett Avenue
City: Bunn

County: Franklin

River Basin: Tar-Pamlico

Stream Classification: NSW: Nutrient Sensitive Waters; WS-V: Water Supply V

Plan Type: Revised Plan

Dear Sir or Madam,

The subject erosion and sedimentation control plan was approved by default. The Sedimentation Pollution Control Act (hereinafter "Act") states that this plan must be filed a minimum of 30 days (15 days for revised plans) prior to the activity and the approving authority must approve or disapprove the submitted plan within 30 days (15 days for revised plans) of receipt of G.S. 113A-54.1. The Act further states that if the approving authority fails to approve or disapprove the submitted plan within the 30-day (15 days for revised plans) period, the plan will be deemed approved. The Certificate of Approval must be posted at the job site. This plan approval shall expire three (3) years following the date of approval, if no land-disturbing activity has been undertaken, as is required by Title 15A NCAC 4B .0129.

As of April 1, 2019, all new construction activities are required to complete and submit an electronic Notice of Intent (eNOI) form requesting a Certificate of Coverage (COC) under the NCG010000 Construction General Permit. After the form is reviewed and found to be complete, you will receive a link with payment instructions for the \$120 annual permit fee. After the fee is processed, you will receive the COC via email. As the Financially Responsible Party shown on the FRO form submitted for this project, you MUST obtain the COC prior to commencement of any land disturbing activity. The eNOI form may be accessed at deq.nc.gov/NCG01. Please direct questions about the eNOI form to the [Stormwater Program staff](#) in the Raleigh central office. If the owner/operator of this project changes in the future, the new responsible party must obtain a new COC.

Title 15A NCAC 4B .0118(a) and the NCG01 permit require that the following documentation be kept on file at the job site:

1. The approved E&SC plan as well as any approved deviation.
2. The NCG01 permit and the COC, once it is received.
3. Records of inspections made during the previous 12 months.

Also, this letter gives the notice required by G.S. 113A-61.1(a) of our right of periodic inspection to insure compliance with the approved plan.

North Carolina's Sedimentation Pollution Control Act is performance-oriented, requiring protection of existing natural resources and adjoining properties. If, following the commencement of this project, the erosion and sedimentation control plan is inadequate to meet the requirements of the Sedimentation Pollution Control Act of 1973 (North Carolina General Statute 113A-51 through 66), this office may require revisions to the plan and implementation of the revisions to insure compliance with the Act.

The developer is responsible for obtaining any and all permits and approvals necessary for the development of this project prior to the commencement of this land disturbing activity. This could include agencies such as the DEMLR stormwater regulations, their enforcement requirements within Section 401 of the Clean Water Act, the Environmental Protection Agency and/or the U.S. Army Corps of Engineers' jurisdiction of Section 404 of the Clean Water Act, the Division of Solid Waste Management's landfill regulations, local County or Municipalities' ordinances, or others that may be required. This approval cannot supersede any other permit or approval; however, in the case of a Cease and Desist Order from the Corps of Engineers, that Order would only apply to wetland areas. All upland areas would still have to be in compliance with the N.C. Sedimentation Pollution Control Act.

If any area on site falls within the jurisdiction of Section 401 or 404 of the Clean Water Act, the developer is responsible for compliance with the requirements of the Division of Water Resources, the Corps of Engineers and the Environmental

Protection Agency (EPA) respectively. Any erosion control measures that fall within jurisdictional wetland areas must be approved by the aforementioned agencies prior to installation. DEMLR must be notified of a relocation of the measures in question to the transition point between the wetlands and the uplands to assure that the migration of sediment will not occur. If that relocation presents a problem or contradicts any requirements of either DWR, the Corps, or the EPA, it is the responsibility of the developer to inform the DEMLR regional office so that an adequate contingency plan can be made to assure sufficient erosion control remains on site. Failure to do so will be considered a violation of this approval.

You are requested to file an amended Financial Responsibility/Ownership Form, if there is any change in the information provided to our office at the time of the initial plan submittal. This permit allows for a land-disturbance, as called for on the application and plan, not to exceed the approved acres. Exceeding the acreage can be a violation of this permit and may require a revised plan and additional application fee. In addition, it would be helpful if you notify this office of the proposed starting date for this project.

Your cooperation is appreciated.

Sincerely,

A handwritten signature in dark ink, appearing to read "Dylan Reinhardt". The signature is fluid and cursive, with a long horizontal stroke extending from the end.

Dylan Reinhardt
Assistant Regional Engineer
Land Quality Section
