	Ram Jack proposes to install 6 pipe piers with concrete footings and a dropped girder to support the floor on the rear left side of the home. We will remove the exiting supports and piers under the existing girder on the rear left side of the home and replace those supports with pipe piers. 3 piers and a girder will be added to support the floors in between the existing girders on the left side of the home. See attached drawing to reference the pier locations. We will attempt to lift and level to the best of our ability but we cannot guarantee lift or crack closure only stabilization. Pipe piers come with a 25 year warranty on labor and material. We offer a 1 year settlement adjustment if needed. If an adjustment is need after 1 year their will be a \$200.00 fee. Also please take notice that the final invoice for this job will have state sales tax added. Ram Jack will also dig a hole at the low point of the crawlspace so that the homeowner can add a sump pump at a later date.	5,550.00	5,550.00
