

Subject: 101 Jewel Farm Rd

You don't often get email from wastewater@wake.gov. [Learn why this is important](#)

Hello,

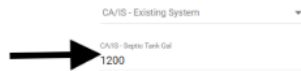

Thank you for speaking with me. Here are a few screenshots with bedroom count information and septic tank size that were not shown on the permit documents.

Bedroom count: 4

A screenshot of a web form. At the top, it says "If Permitted By" followed by "Bobby Weaver" and a dropdown arrow. Below that, there is a label "WIS - # of Bedrooms" and a text input field containing the number "4". A black arrow points to the number "4". Below the input field, there is a label "WIS - Daily Design Flow" and a text input field containing the number "480".

Septic Tank Size: 1200 gal

A screenshot of a web form. At the top, it says "CA/IS - Existing System" and a dropdown arrow. Below that, there is a label "CA/IS - Septic Tank Gal" and a text input field containing the number "1200". A black arrow points to the number "1200".

Please let me know if you need any additional information.

Regards,

Breeze Avila
