

Legend

Areas contain soils with 30 inches or more of useable material and have potential for conventional, modified conventional, LPP or ultra-shallow conventional septic systems. There may be inclusion of soils 24-29 inches to a restrictive horizon that will have potential for LPP septic systems.

Unsuitable Areas

Preliminary Soils Evaluation
~15 acres
2916 Rolesville Road - Wake County

- *Preliminary Soils Evaluation
- *Not a Survey (sketched from public records).
- *Septic system setbacks listed below for new lots.
 - 1) 10' from property lines.
 - 2) 100' from wells for primary and repair systems.
 - 3) 50' from surface waters (streams, ponds, lakes).
- *Any mechanical disturbances such as grading, cutting and filling of the suitable soil areas can render areas unsuitable for future septic areas.
- *See accompanying report for additional information.
- *Base map sketched from preliminary public records
- *Due to Soil Variability, Adams Soil Consulting cannot guarantee that the areas shown as suitable will be permitted by the local Health Department.
- *A more detailed soil evaluation should ber performed prior to further subdivision.
