Grade Separation Projects Along CSX S-Line Railroad

Grade Separation Projects Along CSX S-Line Railroad

Location

📍 **Town of Wake Forest Town Hall - Third Floor**
301 S. Brooks St.
Wake Forest, NC 27587-2901
[Directions to Town Hall](#)

The NCDOT is proposing to construct grade separated crossings or bridges along the CSX S-line railroad tracks in Wake Forest. The grade separations will

- Due to Right of Way Acquisition challenges construction letting has been delayed.
- Construction anticipated to begin in August 2025.
- Construction expected to take 3 years.
- Utility relocations have begun in several areas along the project where ROW has been acquired.

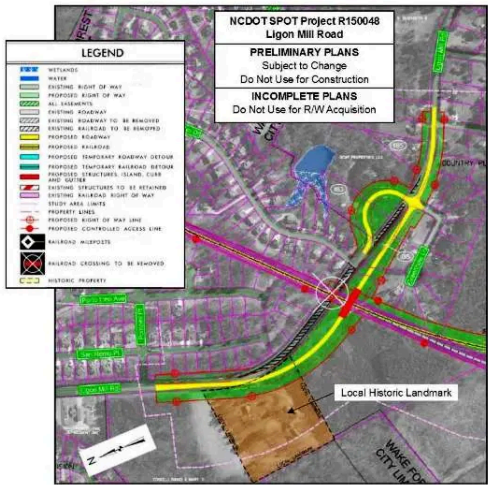

Estimated Costs

- Right of Way and utility relocation \$14,600,000+;
- Construction \$42,500,000

The project proposes to construct a bridge on Rogers Road (S.R. 2052) over the CSX S-line railroad in the same location as the existing at-grade crossing.

Current plans include an on-site detour during construction.

Ligon Mill Road (S.R. 2044) - SPOT Project R150048

Construct a bridge over the CSX S-line railroad Project Schedule

- To be determined based on future funding

The project proposes to construct a bridge on Ligon Mill Road (S.R. 2044) over the CSX S-line railroad. The current design shifts Ligon Mill Road approximately 130 feet south, and provides a new entrance to the Smith Creek neighborhood at Steeple Run Drive.

Current plans allow for the existing at-grade crossing to remain open during construction of the new bridge.
