Fence Guidelines

All fences shall be natural treated finished wood, vinyl, or metal. Color and design must be approved by the Architectural Committee.

Fences shall extend from the side or back of the house.

fence height will be no greater than 6ft.

No wire, chain, or split rail fences shall be allowed.

Construction shall consist of vertical members supported on horizontal members with horizontal members on the inside (house side) of the fence.

All fences require adequate maintenance and upkeep, including (but not limited to) correction of fence bowing, splitting, warping, and breakage.

Note: These are only guidelines. All fences must have written approval from the EKHA Architectural Committee prior to installation.

*****These guidelines dated 03/14/11 supersede any previous written fence guidelines.**
