Notes	Performed 3 systems preventive maintenance. Checked refrigerant pressures and inspected air filters. Cleaned the condenser coil and evaporator coil as needed, and flushed the condensate drain line. Inspected electrical connections and tested capacitors, contactors, and thermostats. Verified system voltage and operating amperage. Measured the supply and return air temperature differential. Tested the system operation after maintenance and found the system operating properly at the time of service. No additional repairs or part replacements were required at this time.	1	\$0.00	\$0.00
