

Preliminary Soils Evaluation

Soil boundary sketches in the field and boring borings field located.

1) 12' from wet ponds or wet detention BMP's.

2) 30' from wet ponds or wet detention BMP's.

3) 30' from wet ponds or wet detention BMP's.

4) 30' from surface waters (streams, ponds, lakes).

5) 30' from wet ponds or wet detention BMP's.

6) 25' from any detention or infiltration BMP's.

Any mechanical disturbances such as grading, cutting and filling of the subsurface soil areas can render areas unsuitable for future septic systems.

These areas are shown as unsuitable for future septic systems.

These map acquired from Vance County GIS not a survey.

Due to Soil Variability, CDEC cannot guarantee that the areas shown as suitable will be permitted by the local health department.

(Note: (unusable) soil areas cannot be used as legal descriptions for purposes of a deed but of record.)

Additional field work may be required for a septic permit (soil type field layout/design)
