Equipment Summary

Technician Comments:

Today we completed your termite inspection. The exterior of the home and garage had no signs of current activity. While the carl space had no signs of any active termites, there were signs of a previous liquid treatment underneath the home to eliminate termite activity. I would suggest that the new homeowner install termite Stations around the exterior of the home to prevent any new activity from occurring on the home

This appointment has 7 images attached. Please visit your customer portal for more details.
