RE: Proposed use of on-site sewage disposal systems in the 25' Tree and Vegetative Protection Zones on 10004 Waterford Court.

Dear Mr. Pearson:

This letter is in reference to Wake County's Unified Development Code (16-12-6(B)) to substantiate that the location of the proposed primary wastewater drain field and/or components on 10004 Waterford Court in the 25' Tree and Vegetative Protection Zone(s) is required. Due to the suitable soil areas, size of proposed houses (5-Bedroom), pool location and/or topography, the location of the wastewater systems are required in the Tree Protection zones to meet the minimum available space required for subsurface septic systems.

Please give me a call if you have any other questions regarding the septic system locations on this lot.

Sincerely,

Jason Hall
