102 MICHELANGELO WAY
A NOTE ON THIS HOME

The current owners purchased 102 Michelangelo Way in April of this year, planning to share it with a family member relocating from out of state. Those plans changed unexpectedly, and the home is back on the market sooner than anyone expected.

In the months since, they have cared for it as a long-term home. Several findings from their inspection were addressed, some by the previous owners before closing and the rest by the current owners after. Because the purchase was so recent, the full record is open to you.

Additionally, the current owners invested in the following improvements:

- New water heater with hot water recirculation pump
- Whole-house dehumidifier
- New dryer vent system
- New kitchen faucet, primary bath shower head, and interior water shutoff valve
- Additional Norman plantation shutters and shades, with motorized blackout shades in the primary bedroom
