Re: Limited Structural Re-Inspection
534 Siltstone Place
Cary, NC

Dear Ms. Coffey:

We inspected the repairs of the subject home on October 13, 2026. The scope and purpose of the reinspection was to determine if the attic truss and foundation wall bolt repairs were installed per Recommendations #1 & #3 outlined in the previous inspection report dated May 8, 2026. The following itemizes our review of the repairs:

1) The attic truss gusset plate repair was installed in general accordance with Recommendation #1 in the previous inspection report. No further structural repairs are required.
2) A nut and washer were sufficiently installed on the front foundation wall in general accordance with Recommendation #3 in the previous inspection report. No further structural repairs are required.
3) Per conversations with Elite Foundation Services regarding the home's rear deck structure and Recommendation #2 in our previous report, further evaluation and design of repairs to the deck was completed by another engineer. Inspection of the deck repairs was not within the scope of our reinspection visit and any certification of those repairs should be conducted by the engineer of record that designed the deck repairs.

The above-listed determinations were made in accordance with the 2024 edition of the North Carolina Residential Code.

We trust that this letter provides the information you require. Please contact us at (919) 465-3801 if you have any questions. Thank you for the opportunity to be of assistance to you.

Sincerely,

NORTH CAROLINA PROFESSIONAL SEAL 33774 ENGINEER CHRISTOPHER A. FLYTHE
