Re: FHA Foundation Inspection
195 Wilders Lane
Louisburg, North Carolina 27549

Dear Sirs:

An inspection has been performed on the foundation of the manufactured home described above. The foundation is properly installed on a crawlspace foundation in accordance to FHA requirements for an existing permanent foundation as specified by HUD-7584, Permanent Foundations Guide for Manufactured Housing, dated September 1996.

The additions to subject home do not appear to be negatively affecting the structure of the manufactured home or its foundation per HUD's construction and safety standards. The unit appears to be located at its original installation location.

Sincerely,

Travis M. Person P.E.
